

Customs Compliance / Clearance

Engineering | Quality | Supply Chain | Compliance

Handling Customs compliance issues is vital for sourcing products from China. It needs to be addressed at the initial stage. Requirements and rules of Customs and other regulatory agencies in both China and the US need to be carefully studied before proceeding on product development and the sourcing plan. Importer should never place a purchase order without thorough study of the compliance issues and concerns related to the products they intended to import.

It can be very costly if importer is not prepared for potential customs compliance issues. We have seen the lessons that Importer were notified at their surprise to pay 383% anti-dumping duty for hand trucks they shipped from China; Or, a food processing machines is rejected for entry by FDA at the discharge port, because of the toxic paint used on the machines; Or Customs release is hold for imported tractors because the VIN numbers are not registered.

We have solid experience dealing with thousands of products in most chapters of Harmonized Tariff Schedule. We have good knowledge to help importers with compliance concerns for most manufactured goods. Also we have built sufficient awareness about when it is necessary to seek assistance from professional customs broker, or even customs ruling. We are very familiar with most kinds of customs procedures and document requirement for importation. We efficiently and effectively work with your suppliers in China to make sure they follow all compliance requirements.

Customs compliance may not just for the importer's side. It can be for the exporter's side as well. In this case, SpecsPro work with customs brokers in China to help if there is any issue.

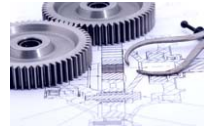

It is to the importer great benefit now and in the future in keeping good customs records. Consult SpecsPro for your importation from China. Visit our website for more detail about our [Customs Compliance program](#).

About SpecsPro

SpecsPro LLC was registered in Minnesota in 2003. Our sourcing specialists have a range of working experiences from 10 to 20 years in import/export, product sourcing, manufacturing, engineering and quality assurance.

The combined knowledge and skill sets of our associates cover a wide range of industrial areas in both business and engineering. Our team of managing associates work from locations in the US and China. We serve US importers from all states and handle sourcing operations in all major cities in China.

We are well versed with business system, business culture and practice in both China and the US. Our industrial experiences come from our solid work history in import / export companies, manufacturers, carriers, freight forwarding and customs brokerage services.

We have an extended business network across the Pacific Ocean. Combined capabilities in business and engineering have become our great strength and the added-value to our clients. We have developed an advance business system in providing reliable and consistent solutions for sourcing products from China.
